Puppy Visits / Pop in Services

I know myself from personal experience that the most stressful part of having a puppy is leaving them for the 1st time on their own during the day. Then you go back work or your life style changes but you still have this very young, venerable and imperishable Pup that you are so fond of! What do you do?

So we at "Walk This Way" would like to offer you a way out of the problem.

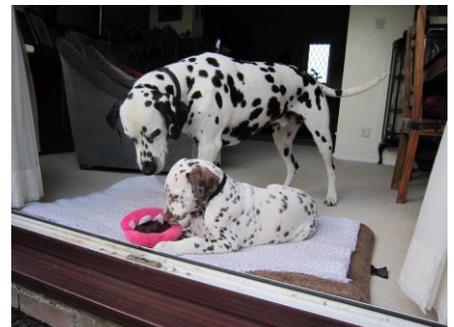

We will visit your home, play with your pup, feed him or her and clean up any unwanted 'accidents' or mess. Puppies require a great deal of love and attention so lots cuddles will all so be on the menu.

We can provide companionship on our visits, which can include indoor or outdoor playtime. We can then build this up as your puppy gets older and include a small walk from your house once your pup has had its course of puppy vaccinations.

Routine and organisation at an early stage of the puppy's life is very important if they are to grow into a confident, well socialized and happy family pet.

We will work with you to arrange to visit your pup within your home. It is recommended that young pups are not left for more than a maximum of around 3-4 hours. Puppy visits can occur late morning and mid-afternoon if you are at work or out all day, so your pup has plenty of opportunities to toilet outside and be given regular interaction.

Once the visit has taken place you will then receive a text to let you know that your pup is safe and sound.
